PETER KIGANYA MBURU

Email: mburukiganya@gmail.com | Phone: +254 712846535

Well-organized, reliable, versatile and client oriented ICT Specialist with expertise in Software engineering and dta analyst, ICT Systems and Network Administration, ICT Projects management, Database management, Software development, End user training and support within a busy and highly automated ICT environment.
My goal is to become a valuable mutual asset by providing efficient business IT & Software engineering competencies and expertise, improve employee productivity and ensure network uptime / systems availability.

CORE COMPETENCIES

- Backend – Python Django, Flask, JavaScript, Node and Expressjs
- Frontend – React, Nextjs.
- User interface (UI) design
- Database Management.
- Artificial Intelligence – Machine learning
- Data Analysis & Insights
- Interactive Dashboards
- ETL (Extract, Transform, Load)
- Business Intelligence (BI)
- Automation of reporting Processes
- Data Documentation
- Row-Level Security (RLS)
- Collaboration & communication

PROFESSIONAL EXPERIENCE

Junior backend developer

Sanasana Sustainability |Apr 25 to Date

- Design, build and maintain the server-side logic that powers application.
- I ensured smooth data flow between that database Apis and the frontend, while focusing on security, performance and scalability.
- Designing and managing database schemas using Django's ORM to interact with various databases like PostgreSQL. MySQL or SQLite which includes defining models, performing migrations, and optimizing database queries for performance
- I collaborated with other developers to integrate features, troubleshoot issues and optimize systems functionality.

Hybrid Full stack developer

Pich safe| April 25 - Sept 25

- Designed and implement interactive, responsive and user-friendly websites.
- Managing databases, Apis and sever-side logic to ensure smooth data processing and secure communication.
- Debugging and testing bugs to ensure the application runs smoothly and efficiently.
- Managing the infrastructure and deploying the application to a cloud environment.

- Writing unit and integration tests to ensure code quality and functionality, and effectively debugging issues that arise during development and deployment

Intern – IT Department

Sarova Stanly |Jan 2020 – March 2020

- Provide onsite and remote support to end users for computer, servers, printers, software & telecom needs.
- Installation/ configuration, operation and maintenance of servers systems and software and related infrastructure.
- Assisted in evaluating, monitoring and enhancing IT infrastructure with an emphasis on availability, reliability scalability, security, data confidentiality and security integrity.
- Ensured internal and external network was running consistently, smooth and fast with 0% downtime during working hours across the company Network.

EDUCATION

Bachelor of Science – Computer science – (Ongoing)
Chuka University | 2022–2026

TRAINING AND CERTIFICATIONS

- Learn Python from Scrimba February 2025
- Backend – Django from Emobilis Sept 24 to Jan 25
- IBM Data Fundamentals Jun 2025
- IBM Data Fundamental with Capstone Project Jul 2025
- IBM Artificial Intelligence Fundamentals Jul 2025
- Udacity Introducing Generative AI with AWS July 2025
- R STATISTICS, STATA and SPSS kesap Research Center June 2019

LANGUAGES

- English-Fluent
- Kiswahili-Fluent
